

MTEP Futures Development

Planning Advisory Committee

June 12, 2019

Purpose & Key Takeaways

Purpose:

- Discuss the MTEP20 futures
- Discuss the proposed work plan for developing the next MTEP futures

Key Takeaways:

- Many Stakeholders have expressed interest in beginning the MTEP21 Futures as soon as possible
- In order to allow for greater time to focus on that, MISO is considering stopping work on the MTEP20 Futures
- MISO will be soliciting feedback on this potential approach

MTEP20 Futures Development Process

- While stakeholders generally support MISO's MTEP20 Futures proposal with the commitment to redevelop the MTEP21 Futures, there are areas where stakeholders would like to see additional discussions and/or additional/different assumptions within the MTEP20 Futures.
- In addition, interest in beginning discussions/development of the next MTEP Futures early or 'as soon as possible' has been consistently high throughout the MTEP20 Futures process
- Is there an opportunity to carve out more time to dedicate to having these desired conversations and fold them into the broader discussions/development of the next MTEP Futures?

MTEP20 Futures Development Process

- Prior to finalizing the MTEP20 Futures narratives and assumptions, MISO wants to pause and check-in with stakeholders
 - Should MISO continue forward in completing the MTEP20 Futures? or...
 - Should MISO stop work on developing the MTEP20 Futures and pivot our focus solely on developing the next round of MTEP futures, including discussions of process improvements to the futures/siting processes?

Feedback Request #1

- Please provide feedback on whether MISO should continue forward in completing the MTEP20 Futures or to stop and pivot our focus solely on developing the next round of MTEP futures, including discussions of process improvements to the futures/siting processes.
- **Feedback due Friday, June 28, 2019**
 - All feedback requests are posted to the Stakeholder Feedback Page & stakeholder comments are submitted through the feedback tool
 - <https://www.misoenergy.org/stakeholder-engagement/stakeholder-feedback>

MTEP21 Futures

MISO proposes to tackle the development of the next MTEP Futures / Sitting Processes in three distinct phases

What do we currently do? / Why do we do it?

Likely 1 or 2 workshops

Global assumptions / Process Improvements

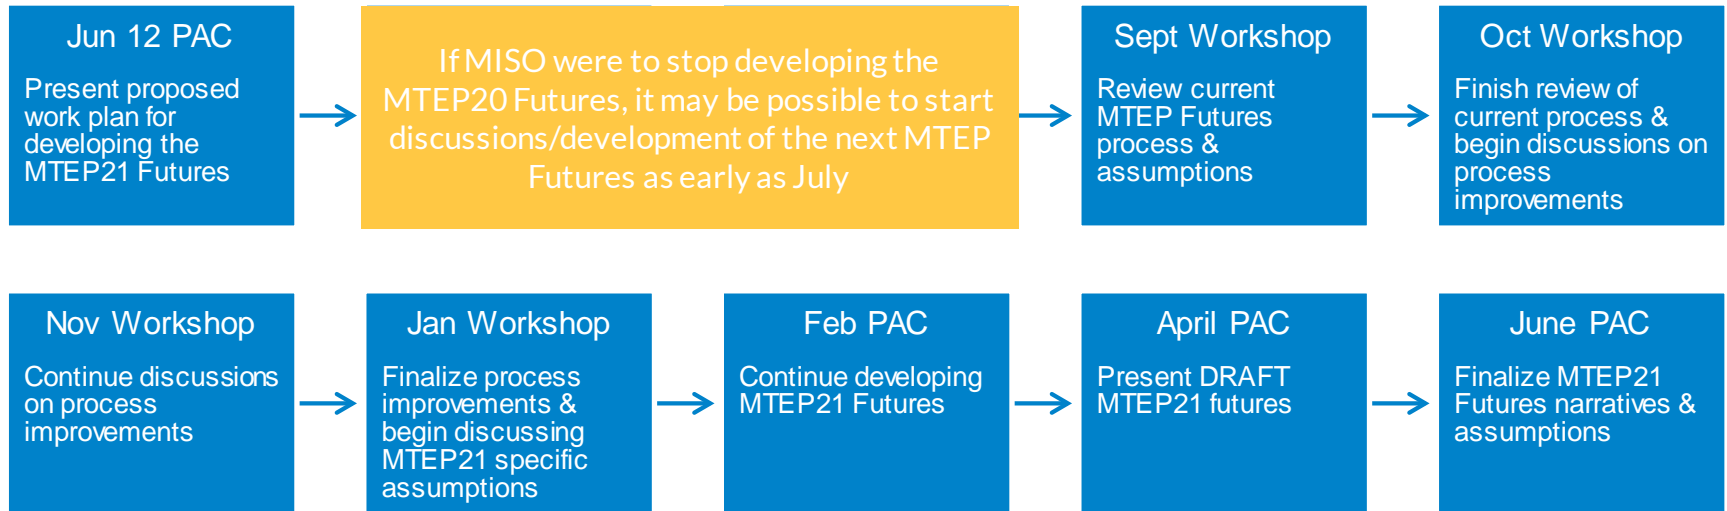

The bulk of the time and effort should be spent here through the rest of 2019 and into 2020

MTEP21 Futures Specific Assumptions/Narrative Development

MISO proposes to spend the next 12 months improving & developing the MTEP21 Futures / Sitting Processes

Proposed MTEP21 Futures Development Schedule

Feedback Request #2

- Please provide feedback on MISO's proposed work plan for developing the next MTEP futures, including discussion of process improvements to the futures/siting processes.
- **Feedback due Friday, June 28, 2019**
 - All feedback requests are posted to the Stakeholder Feedback Page & stakeholder comments are submitted through the feedback tool
 - <https://www.misoenergy.org/stakeholder-engagement/stakeholder-feedback>
