

# Long Range Transmission Planning

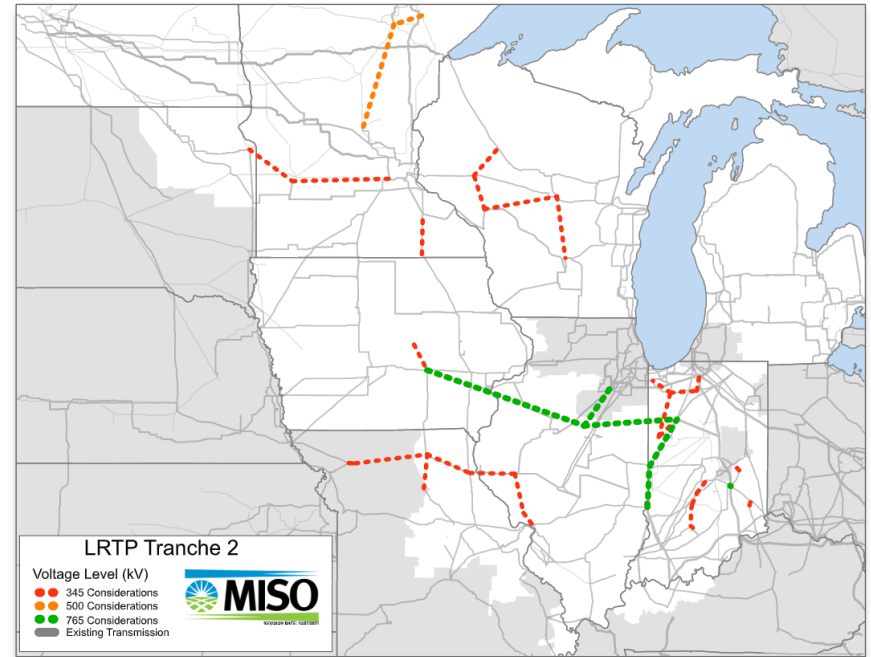

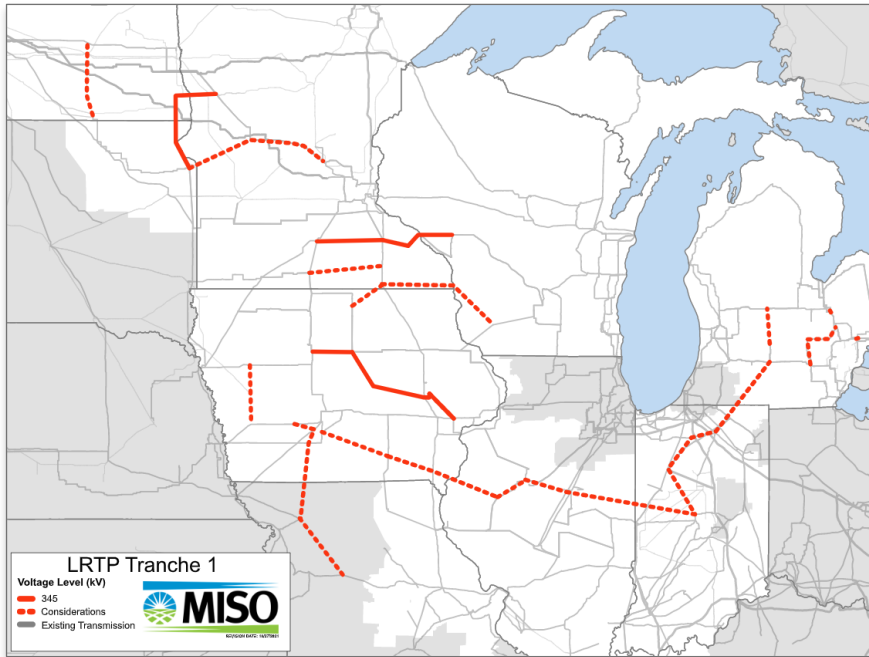

Entergy Regional States  
Committee (ERSC)

November 9, 2021

- Regional transmission planning is needed to accommodate the current and future resource fleet shift
- MISO workshops are underway to discuss economic, reliability analysis and regional transfer analysis, and business case justification for tranches of regional projects
- Workshops are scheduled monthly, with the next workshop on November 19

# L RTP projects will promote regional bulk energy transfer, interzonal support, resource integration and retirements

# MTEP21 LRTP Stakeholder Review Timeline
