1. Introduction

MISO Data Exchange comprises APIs (Application Programming Interfaces) that enable users to access MISO market report data for use in their own applications. MISO has historically offered reports comprising analysis and status of market operations.

With the launch of the APIs in the MISO Data Exchange, users now have an endpoint from which to collect and consume data in the way that best serves them.

This guide is intended to provide an overview of how to access and begin using the MISO Data Exchange.

2. Requirements

- A **MISO website account** is required to create a Data Exchange account. If you do not have an account on the MISO website, refer to the steps in [this Knowledge Article](#) to create one.

3. How to Access the Data Exchange

To access the Data Exchange, you must create an account on the Data Exchange site.

- 1) Navigate to <https://data-exchange.misoenergy.org>.
- 2) Click **Sign up**.

- 3) Enter the username and password associated with your MISO website account and click **Sign In**.

A login form titled "Log in to MISO Data Exchange". It contains two input fields: "Username" and "Password". The "Username" field has the placeholder text "Username". The "Password" field has a series of asterisks as a placeholder. Below the fields is a blue "Sign In" button. A green circle with the number "3" is positioned to the right of the "Sign In" button.

- 4) This will authenticate you, create a linked account in APIM (MISO's Authentication Service) and log you in.

4. How to Locate the APIs

- 1) Click the **APIs** tab within the Data Exchange menu bar to view the list of APIs.
- 2) Click the **name** of an API.

5. How to Subscribe to an API

MISO values the security of authentication. In order to access an API, you must have a subscription to it. Once subscribed, you are assigned a subscription key which allows you to programmatically query the API. This allows you to get the data you need without downloading reports and writing programs to consume a variety of report formats (.xlsx, csv, pdf).

- 1) Click the **Products** tab within the Data Exchange menu bar.
- 2) Select the desired **API Name**.

- 5) **Example code** showing developers how to format their requests for calling (accessing) the API will appear.
- 6) Click **Reveal secrets** to reveal your subscription key in the example code.

The screenshot displays the MISO API Explorer interface. On the left, a sidebar shows a list of API endpoints under the 'Pricing API' category. The main panel shows the details for the 'Retrieve Ancillary Services Market clearing prices (MCP)' endpoint. A dropdown menu labeled 'API definition' is highlighted with a green circle and the number 5. Below this, the endpoint is described as 'Retrieve Ancillary Services Market Day-ahead ExAnte Market clearing prices (MCP)'. A table of request parameters is shown, with columns for Name, In, and Required. The 'date' parameter is listed with 'template' as its 'In' value and 'true' as its 'Required' value. The response is noted as '200 OK' and 'Successful operation'. On the right, the 'HTTP request' section is expanded, showing a Python code example for making a GET request to the endpoint. A green circle with the number 6 highlights the 'Reveal secrets' button next to the code.
