

EMERGENCY DEMAND RESPONSE CERTIFICATION

Consistent with the procedures set forth in Schedule 30 of the Open Access Transmission, Energy and Operating Reserve Markets Tariff (“Tariff”) of the Midcontinent Independent System Operator, Inc. (“MISO”), and the requirements for submitting an Emergency Demand Response Offer (“EDR Offer”), the Market Participant certifies that:

- 1) It has received the required approvals from all applicable state regulatory agencies enabling the entity to participate in the MISO’s Demand Response Market.
- 2) If it uses a Behind the Meter Generation Resource:
 - a) The Market Participant (or a party with which the Market Participant has a contractual agreement) holds all necessary permits applicable to the operation of the Generation Resource;
 - b) The Market Participant possesses rights (which may be through contractual agreement) to operate the Generation Resource that are equivalent to ownership for purposes of participation in the MISO’s Demand Response Market; and
 - c) The Behind the Meter Generation Resource is not a designated Network Resource.
- 3) It has the metering equipment capable of providing the meter data on a no less than hourly basis pursuant to the provisions in Schedule 30 of the Tariff.
